CAMBRIDGE ASSOCIATES ASIA PTE LTD

Cambridge Associates, LLC was founded in the early 1970s to assist non-profits and other sophisticated institutional investors with the management of their long-term assets. Today, we serve more than 850 clients in 25 countries, representing aggregate assets of over US\$1 trillion. Our work extends across all asset categories on a global basis. We provide our clients with investment and financial planning services, original capital markets research, and performance evaluation services.

We have a staff of more than 800 located in seven offices, including 180 Consultants and 110 Consulting Associates. We select our colleagues with great attention to their potential to become a valuable member of a collegial, intelligent and hard-working team. Due to continued growth, we are seeking talented professionals to join the team in our Singapore office. Candidates with a strong interest in investments and relationship management are encouraged to apply.

Investment Consultant

As an Investment Consultant you will advise clients on the management of institutional and family assets with a primary goal of enhancing the long-term investment performance of the portfolio. Your responsibilities will include developing investment objectives; allocating assets; selecting investment managers, and evaluating fund performance. The role covers all asset classes and involves extensive client contact. The Consultant position is an outstanding opportunity to combine your skills in quantitative and qualitative analysis on a diverse range of financial topics with your expertise in managing client relations. Consultants work directly and closely with the owners and/or fiduciaries of the investment assets, which may be the Investment Committee of a Board of Trustees, an institution's Chief Investment Officer, or the principals in a family office.

Requirements

Successful candidates will have at least 5 years' experience working in a related field, such as equity analysis, fund management or strategy consulting, with the ability to demonstrate expertise in financial analysis. Applicants must possess a thorough knowledge of investment management theory and practice, strong quantitative and conceptual analytical skills, and proficiency in verbal and written communication. Additional qualifications such as an MBA or CFA are strongly preferred.

How to Apply

Qualified applicants should send a cover letter and resume to sgjobs@cambridgeassociates.com. Information on Cambridge Associates is available on our website at www.cambridgeassociates.com.
